**MAINTENANCE & CARE:** A maintenance coat is required periodically to keep your door looking its best. We strongly recommend recoating at least every two years or when the finish loses sheen or gloss. The door must be cleaned and dried before applying a clear, UV resistant, exterior grade, breathable top coat. Detailed cleaning and recoating instructions are available at [clopaydoor.com](http://clopaydoor.com).

For more detailed information or availability of our stain colors, please contact your Clopay Pro-Series Dealer. To locate a dealer to help you select the right door for your home, just go to [www.clopaydoor.com/dealer](http://www.clopaydoor.com/dealer) or call 1-800-2CLOPAY (225-6729).
