

600 *Series*

The 600 Series | 610 | 612 | 660 | 670 | 680 | 690

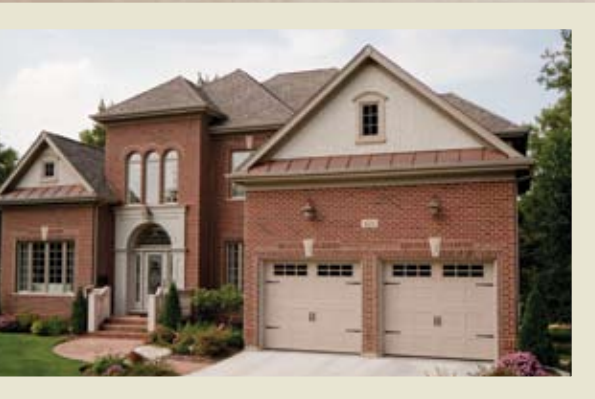

The 600 Series offers the look of deep embossed wood grain with the strength and durability of heavy gauge galvanized steel. The 600 Series is urethane insulated for energy efficiency and engineered for years of virtually maintenance free use without the worry of warping, cracking, or rotting. Backed by a Limited Lifetime Warranty, the 600 Series is ideal in all climates and offers a full range of color and window options. Adding beauty and value to your home has never been so easy!

R Value
13.45

Technical Information

The **600 Series** is offered in 12 pre-finished colors. This series provides maximum energy efficiency with 1³/₈" thick, CFC FREE, polyurethane insulation with a calculated R-Value of 13.45, resulting in doors that provide more than five times the insulating value of wood or non-insulated doors. The 600 Series includes a three-tier, corrosion-resistant protective finish with a polyurethane primer and a durable polyester finish coat on the interior and exterior. A vinyl top cap and bottom cap provide a **full-thermal break**, separating the outside steel from the inside steel. Included is a heavy vinyl bottom weather seal. This combination of protection seals out the elements and repels the most hostile weather conditions. See our Window Option literature for all window and glass options. The 600 Series is available in a wide range of design pressures for wind load requirements.

600 Series Models
